

*Here's 5 reasons US Dedicated is the absolute **BEST** choice for your infrastructure:*

Extreme performance, gaming-grade, ultra-low latency network.

US Dedicated utilizes pure Internap Performance IP Bandwidth. This route optimized network allows us to take metrics of latency, jitter and packet loss to determine the absolute best path for your data across up to 12 Tier-1 ISP's.

World Class Facilities will keep your infrastructure secure and online with our 100% uptime SLA.

At US Dedicated, we utilize only the best when it comes to Datacenter facilities. SOC Type 1 & 2 Certified, PCI and HIPAA compliant hosting is crucial when handling sensitive and secure data.

Instant DDoS protection & mitigation will keep your servers online during the most intensive attacks.

With Corero's In-Line, Always-On and instant DDoS detection and mitigation, you'll never feel the effects of a DDoS attack, even throughout the most demanding streaming and gaming applications!

Multiple locations allow for great customer reach, low latency, and geographical redundancy.

Currently we have 3 facilities spanning across the US: Chicago and Los Angeles powered by Coresite, and Dallas through Cologix. All backed by our 100% uptime SLA, Performance IP bandwidth by Internap, and On-Premise, In-line & always on DDoS mitigation!

A company you can trust!

One of our fundamental core values is true transparency to our customers. This is also backed by our 100% uptime SLA. Never be left in the dark during any disaster. We'll keep you updated and in the loop should any issue arise, and we take a very personal approach with our customers. We take out the barriers of the corporate run-around and firmly believe in EARNING your business every month!
